

I am deeply opposed to this petition because it represents another step on the road toward concentrating media in fewer hands. Allowing Qwest to have a virtual monopoly in providing Internet Service over its DSL lines will remove competition from ISP choice, resulting in fewer choices and eventually worse service to consumers. I wish to continue to use the ISP I have always used.

In addition, I do not believe that Qwest's unregulated DSL pricing would continue to be fair since there is no other DSL provider in my area.
